

Enterprises catalogue

of the east of Ukraine

east-expo.com.ua

East Expo 2020 catalogue of Donetsk, Zaporizhzhia and Luhansk oblasts enterprises has been developed in cooperation with Donetsk, Zaporizhzhia and Luhansk Oblasts State Administrations, Ukrainian Chamber of Commerce within the United Nations Recovery and Peacebuilding Programme (UN RPP) and with the financial support of the European Union, governments of Denmark, Poland, Japan and USA.

The views, opinions and comments contained in this catalogue may not coincide with the official position of UN RPP, the EU and the governments of Denmark, Poland, Japan and USA.

The United Nations Recovery and Peacebuilding Programme (UN RPP) is being implemented by four United Nations agencies: the United Nations Development Programme (UNDP), the UN Entity for Gender Equality and the Empowerment of Women (UN Women), the United Nations Population Fund (UNFPA) and the Food and Agriculture Organization of the United Nations (FAO).

Thirteen international partners support the Programme: the European Union (EU), the European Investment Bank (EIB), the U.S. Embassy in Ukraine, and the governments of Canada, Denmark, Germany, Japan, the Netherlands, Norway, Poland, Sweden, Switzerland & the UK.

Decent Work and Economic Growth

The UN Recovery and Peacebuilding Programme has been holding East Expo business exhibitions for four consecutive years in Ukraine. In 2017-2019, East Expo was held in Kramatorsk, Severodonetsk and Lviv, and then twice in Kyiv. Overall, these exhibitions were attended by more than 8,000 visitors, with 250 domestic companies presenting their products.

A total of 70 percent of the participants found new business partners through the event. In 2020, East Expo will be held online for the first time. The central event of the exhibition is the presentation of goods and services offered by micro-, small- and medium-sized businesses in Donetsk and Luhansk oblasts, and on the Azov Sea coastline in Zaporizhzhia Oblast, on profiles on the East Expo website and on the Dіia.Business website. The goods and services range from food, clothes, salt products and ceramics to IT technologies, 3D printers and eco-products.

This catalogue contains information about over 400 leading companies in Donetsk, Luhansk and Zaporizhzhia oblasts that already export their goods and services or that have the potential to expand the target markets for their products. These are small- and medium-sized companies. Over 150 of these companies are participants in, and exhibitors at, the East-Expo 2020 online exhibition. Here you will find the latest products and services that are available on the market of Donetsk, Luhansk and Zaporizhzhia oblasts.

The UN believes that small- and medium-sized businesses are the future of the region, and are a powerful driver of the country's economic development as a whole.

Bilovodsk Butter Factory PrJSC

Business profile:

Milk processing and cheese manufacture.

Company's profile:

Bilovodsk Butter Factory PrJSC is a well-developed enterprise, its core activity being milk processing and cheese manufacture. Its products are in demand at both regional and national levels. The company has expanded its dairy product range considerably (to more than 50 titles), and has been introducing new production technologies. In addition to its main product, Selianske butter, the factory makes Dniprovske and Bilovodske vegetable butters, drinking milk, sour cream, lactic cheese, brynsa, Adygeyskii cheese, sour cream des-serts, and technical casein. The enterprise continuously upgrades its process and auxiliary equipment, meeting modern requirements of advanced technologies.

According to an international economic ranking, the company is a leader in its activity sector, received the Enterprise of the Year 2010 status, and won the 14th position among all Ukrainian enterprises.

Collaboration proposal:

We offer high-quality dairy products to domestic and foreign agro-industrial sector companies. We are willing to establish new business relations with partners.

IE V.V. Mazur

Business profile:

Provision of services to the public.

Company's profile:

Individual entrepreneur V.V. Mazur is a temporary displaced person from Luhansk city who has only for the second year been engaged in provision of services on old furniture restoration. He can perform all the works required to make the furniture look in a new and more modern way. During the upholstered furniture refinishing, he replaces upholstery, polyurethane foam, and parts not subject to restoration. As an undoubted benefit of the furniture renewal, the entire process does not take much time and can be done at the customer's home.

Collaboration proposal:

The entrepreneur provides services on restoration and refinishing of upholstered furniture and finished articles in general (sofa, armchair, chair, couch, etc.), on replacement of motor car interior upholstery, and manufacture of tents.

PryLisne hotel complex

Business profile:

Provision of services on temporary accommodation for a holiday period and other temporary accommodation. Provision of hotel services.

Company's profile:

PryLisne hotel complex is situated on a lake shore. There is a sand beach for those who like to laze in the sun in summer. In a flicker of a second, clean forest air will carry you over to a world of tranquility and healthy good rest. The complex's location allows you to feel yourself actually like on a unpeopled island because urban civilization is 10 km away. The complex area is covered by wi-fi. For those who like to combine pleasant recreation with a job they love, business meeting and commerce, the complex offers a specially equipped conference hall. PryLisne has two billiard tables, and boat and bicycle rentals for various age groups. You can rent an arbour with or without a grill for quiet company rest. Our guests can swim in large (10x20 m) swimming pools.

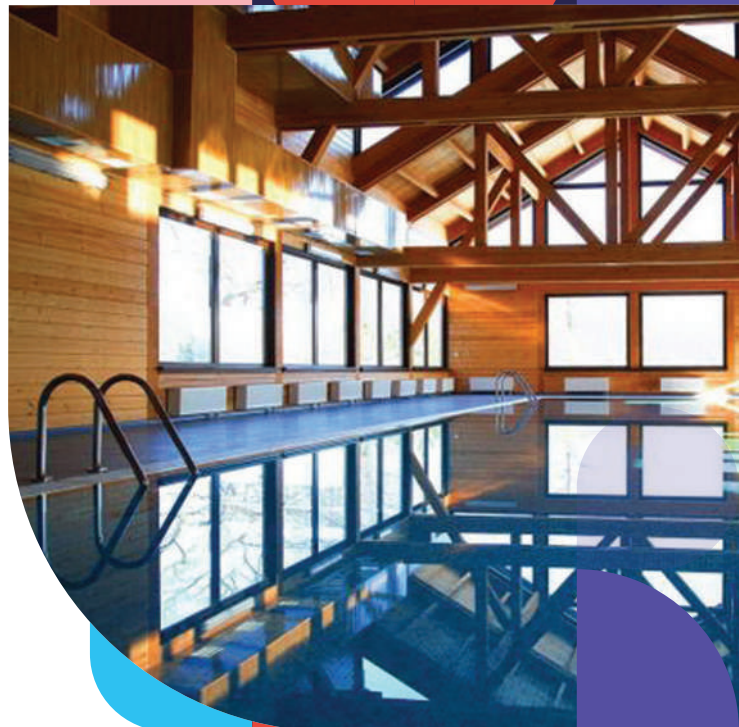

An open-air swimming pool works in a warm season, with water heated. An indoor swimming pool works all year round and is equipped with a recreation zone. The pools are equipped with modern cleaning facilities. Their crystalclear water contains no chlorine and does not dries skin. The 20 m pool length allows our guests to maintain their usual swim speed and distance. The swimming pools have a recreation zone with comfortable deck-chairs.

NVP AEROMEH LLC

Business profile:

Design production of grain cleaning machines – CAD separators.

Company's profile:

The Aeromeh Ukrainian plant is a developer and manufacturer of a unique technology allowing to obtain high-yield and strong seeds with the aid of CAD separators.

Collaboration proposal:

The plant has been producing 22 CAD separator models since 2001, supplying them to over 50 countries across the world. We have been continuously improving our separator model range, currently producing separators for 4-150 t/h with an aspiration system and cyclone. The working quality of CAD separators is also improved by a built-in scalping machine for pre-cleaning. Now it's actually two machines in one case. The same grain-cleaning machine can simultaneously perform preliminary, primary and secondary cleaning of any kind of grain. Besides, the CAD separators work with any source material without strict limitations in terms of humidity and contamination. Lack of sieves and replaceable components allows the CAD separators to perform cleaning and calibration of all types of agricultural crop seeds, from small hayseeds to large bean and pumpkin seeds.

Lysychansk Brewery Plant LLC (LISPI LLC)

Business profile:

Production of low-alcohol beverages (beer) and malt.

Company's profile:

LISPI LLC is an eastern Ukrainian enterprise in Luhansk oblast, a successful beer and malt producer for 46 years. The beer is made according to a classic technology in two stages: primary fermentation, and after-fermentation during 20-40 days depending on the beer brand. The main raw material for beer production is a light brewer's barley malt made in the plant's malt shop. The malt is produced from high-quality brewing barley. The malt shop completely meets the plant's annual malt demand. Besides, the malt is sold to other breweries. Using modern German-made equipment in the production process allows us to make beer with two-month stability in glass bottles, with 45 days in PET bottles, and 30 days for beer in kegs – without any preservation agents. We ensure continuous control of taste qualities of our products. At present, the plant makes 12 beer brands (10 light and 2 semi-dark brands). The plant has many awards for high quality of its products, received in various years: 8 gold medals, 5 silver medals, 2 bronze medals. Besides, it is the winner of the competitions “100 Best Goods of Ukraine” and of Luhansk oblast.

Collaboration proposal:

We offer domestic companies, dealers and supermarkets high-quality products of the Brewer's Soul, Sich and DeutschHof trademarks certified under UkrSEPRO systems. The enterprise makes light beer brands such as Brewer's Soul Light, Brewer's Soul Premium, Brewer's Soul Strong, 95, Zhiguli, Zaporizka Sich, Moscow, Honey; Chumatske semi-dark beer. Besides, the enterprise sells the products made by its partner company, Dimiors Melitopol Private Brewery, that manufactures premium beer brands according to Czech and German brewers' recipes: Vienna, Munich and South Bavaria.

Christmas Tree Decorations LLC

Business profile:

Manufacture of Christmas tree decorations.

Company's profile:

The company makes glass Christmas tree decorations (for New Year holiday, decorations with logotypes). The Christmas tree trimming tradition goes back deep into the past. In our time, it is customary to welcome the New Year near a Christmas tree that shines all colours of the rainbow. To make the tree shine, our company designs a wide range of Christmas tree decorations and various ornaments that will take a rightful place on the New Year beauty beside old ones. We also offer colourful and strong packaging for Christmas tree decorations. The company's products are not subject to certification. They are exported to Russia and Belarus.

Collaboration proposal:

We offer glass Christmas tree decorations to foreign companies.

Khlibnyi Dim Kyrylova LLC

Business profile:

Manufacture of bakery products, fancy pastry and confectionery products.

Company's profile:

Khlibnyi Dim Kyrylova LLC is one of the largest manufacturers of bread and bakery products for all tastes. The enterprise has been supplying its high-quality and delicious products across the region for 18 years. Two functional bakehouses, fitted with modern import equipment, make products meeting strict requirements of standards. The enterprise employs only skilled specialists having great working experience. Ancient national recipes and only traditional technologies are used for the manufacture of bakery products. No new-fashioned technological additives – improvers, baking powders, ferments or emulsifiers – are used because they are unable to compete with the taste of bread made using living yeast and milk starters.

Collaboration proposal:

We offer high-quality products to the domestic market.

NVF MIKROKHIM LLC

Business profile:

Manufacture of active pharmaceutical ingredients and medicines.

Company's profile:

NVF MIKROKHIM LLC is a Ukrainian pharmaceutical enterprise with a full cycle – from synthesis of active pharmaceutical ingredients to development and production of ready-made medicines. MIKROKHIM has been making European-quality medicines that enjoy demand across Ukraine and abroad for 27 years now. The company continuously expands its product portfolio and the range of dosage forms, increasing the share of proprietary complex pharmaceutical compositions in the portfolio.

Collaboration proposal:

1. We offer domestic and foreign pharmaceutical distributors high-quality medicines.
2. We offer domestic and foreign medicine manufacturers:
 - active pharmaceutical ingredients;
 - development of new pharmaceutical compositions on the “turnkey” basis with preparation of a full package of registration documents;
 - contractual production of liquid and solid dosage forms;
 - laboratory research of qualitative and quantitative composition of pharmaceutical substances, auxiliary ingredients, and ready-made medicines, with issuance of a certificate.

SFERA LLC

Business profile:

Growing of grain and technical crops (except rice), leguminous crops, and oil crop seeds; pig farming.

Company's profile:

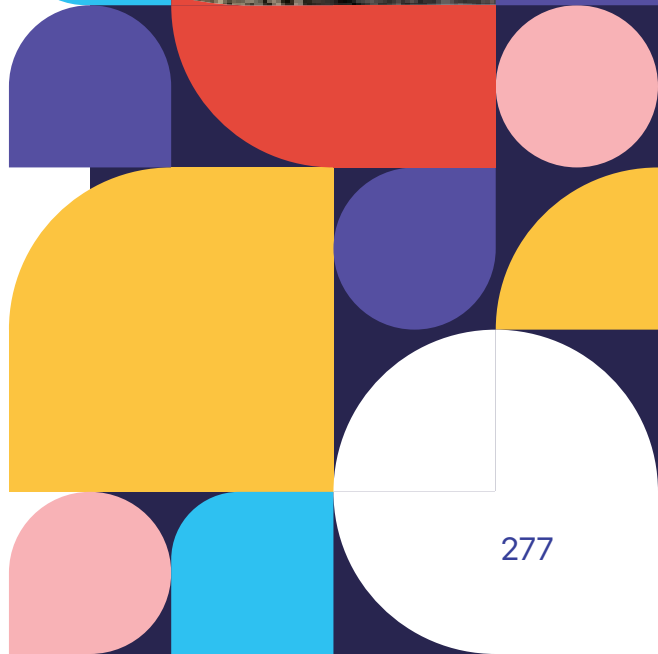

The company is engaged in pig farming and plant growing (production of grain crops, open-ground vegetable growing, and berry growing). The company provides permanent employment to 60 people, and it hires additional staff for harvesting. It tills about 3,000 ha of land. The company cultivates winter wheat, corn, sunflower, and sorgo. It applies drop irrigation for good vegetable yields. The Sfera staff try to feed residents of surrounding areas, mainly Sievierodonetsk city, with useful but non-expensive vegetables and berries – cabbage, cucumbers, tomatoes, strawberries, and currants. At present, it sells pork only to entrepreneurs who trade at markets. The enterprise's pig stock is about 3,000 pigs simultaneously reared. Its main monoculture is corn. We have two modern American-made dryers as well as infrastructure for long-term storage.

TD Evrotrubplast LLC

Business profile:

Production of polymeric pipes for water and gas supply and sewerage networks.

Company's profile:

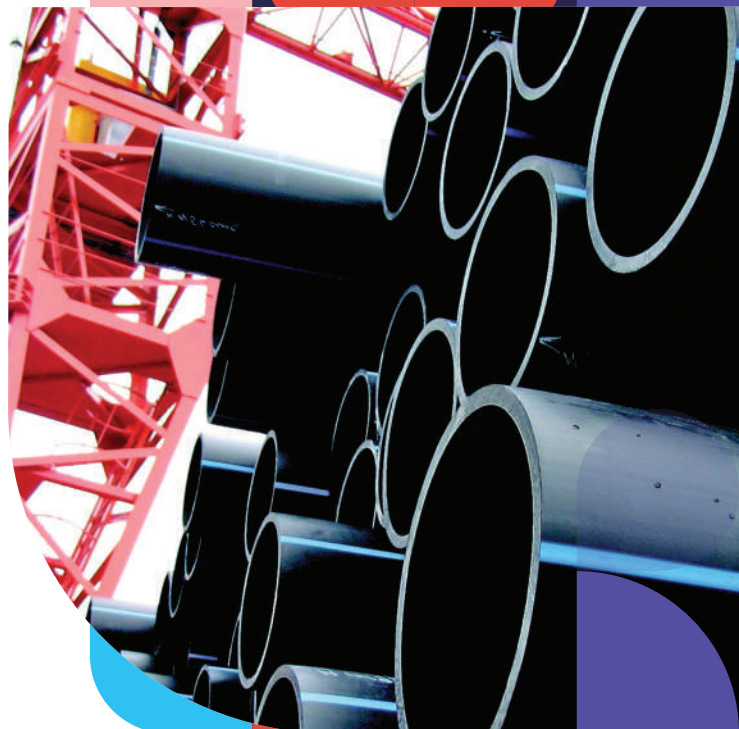

TD Evrotrubplast is a branch of Radius Systems Group that includes polymeric pipe-producing enterprises in Austria, Great Briatin, Belarus, Kazakhstan, Latvia, Poland, Russia, and Ukraine. Its core activities are as follows: organization of the trading process for the entire range of the Group's products, design and technical follow-up of facilities using polymeric pipes, and management of Rubizhne and Kalush pipe plants. Rubizhne pipe plant manufactures polythene pipes for gas pipelines, water pipelines, and force main sewerage, with 20 to 1,200 mm diameter and up to 16 atm pressure, as well as segmented fittings for water supply systems. The main polythene processing production unit has 8 extrusion process lines that manufacture polythene pipes. The main focus in production is on the use of high-quality European raw materials. The Evrotrubplast's warehouse stock is about 2,000 km of pipes. The joining elements storage – a fitting centre – is continuously updated, which allows meeting the customer's demand for parts of any type and size. The storage has about 140 thousand of various joining elements available as well as dozens of welding sets for electrofusion and butt welding.

Collaboration proposal:

We produce and offer high-quality polythene pipes for gas pipelines, water pipelines and force main sewerage networks, KORSIS two-layer corrugated polythene pipes for non-pressure sewerage networks, and segmented fittings for water supply systems.

Khimpostachalnyk PE

Business profile:

Manufacture of products for various chemical industries (raw materials for production, paints and varnishes; foamed polyurethanes; glues).

Company's profile:

Khimpostachalnyk company occupies the leading positions in the country's chemical sector. We successfully make and sell products for various market segments: a complex of additives and bases for construction and industrial paints and varnishes; a complex of additives for PVC reprocessing; resins for paper treatment for chipboard lamination; unsaturated polyester resins, and many other products. Another promising production segment consists of saturated polyester resins that are the basis for production of foamed polyurethanes used for thermal insulation of walls, roofs, tanks, pipelines as well as in the manufacture of preinsulated pipes, shells and refrigerating equipment, for the manufacture of decorative elements of building fronts. Investments in the development of research and production facilities, and engagement of highly skilled staff to work as process engineers and managers allowed the company to create a scientific and production enterprise having its own research centre that includes a laboratory for technological interaction with the customers. Based on the centre, product manufacturing technologies are developed for use in various chemical industry niches.

Collaboration proposal:

Our enterprise manufactures and sells a wide range of products for various chemical industries. Adhering to the individual approach principles, our research units can develop new formulas and processes to take account of all the customer's requirements and wishes, using which will ensure high cost-effectiveness.

BKF LLC

Business profile:

Polythene reprocessing enterprise.

Company's profile:

Production of industrial and household packaging from polymeric materials, polythene reprocessing, flexographic four-colour printing on rolled materials, lamination of paper, foil and polypropylene fabrics.

Company's profile:

BKF LLC is an enterprise with long-term work experience in the packaging production. It traces its history back to the early 1990s. We manufacture and sell polythene packaging for enterprises from chemical, medical, construction, agricultural and food industries; and deposit polythene coatings on paper, foil and fabric with 10-30 g/m² density. To our customers, it is important to know that they obtain a high-quality product. Only having a complete production cycle can guarantee quality in every phase. All the products meet the ISO 9001:2008 and UkrSEPRO standards; every batch of products is controlled in all production cycle phases. We are continuously looking for possibilities to enhance the technological level of our packaging and make it effective for our customers.

Slobozhanskyi Zavod Prodtovariv LLC

Business profile:

Production of unrefined vegetable oil and fats.

Company's profile:

Slobozhanskyi Zavod Prodtovariv LLC managed to achieve high product quality and productivity indicators over a rather short period of time due to the high skill level of its managers and technical staff. Existence of an accredited laboratory at the enterprise's enables it to control quality of products on the continuous basis. The oil production technology allows to preserve all useful components – vitamins and minerals – during the production process. The company's products meet all necessary quality standards, which is confirmed by the appropriate documents issued by public authorities.

Collaboration proposal:

We offer our products at affordable prices. To produce oil, the company uses oilseed crops that do not contain genetically modified raw materials and are grown in environmentally clean fields of Ukraine.

Honey Spring Apiary (IE Litvinova O. I.)

Business profile:

Manufacture of honey, bee products and natural body care honey products

Company's profile:

The apiary is located on the grounds of Svativskiy Faunal Reserve of local significance, a nature conservation area of Luhansk oblast boasting a plenty of acacias, maples and lindens, good honey plants, in addition to a variety of steppe and forest flowers, with sunflower fields in the neighbourhood. The range of Honey Spring products includes May, herb and sunflower honey. Also, we offer honey with cinnamon, turmeric, pollen, walnuts and dried fruits. By the way, nuts and fruits grow in the apiary's garden. Besides, the company produces tea of medicinal plants that grow on the reserve's grounds. Recently, we have launched production of natural skin care products, which are growing very popular. These are scrubs, anti-cellulite products, face and hair masks, soap, cream soap, lip balms and cuticle-care oil. We also have souvenirs such as candles, baskets, money-boxes and the like. Everyone who visits Luhansk oblast can buy souvenirs to commemorate the journey, as well as make an exclusive and caring gift to their loved ones and friends for any calendar or Church holiday. Apiary's souvenirs have presented Luhansk oblast outside Ukraine, too, in Poland, Denmark, Estonia, Lithuania, Germany, Jordan and India.

AgroAnaliz-Ekspert LLC

Business profile:

Technical and scientific research, consulting.

Company's profile:

AgroAnaliz-Ekspert is a centre of practical and scientific knowledge in agronomics, agricultural chemistry, phytopathology, bacteriology, entomology, and nematology. The enterprise has several units employing professionals due to whom you will be able to receive, within the shortest possible terms, reliable information about the conditions of fields and plants as well as crop forecasts. The company's key advantage is professional comprehensive systemic monitoring that consists of: analysis of seed and planting materials, soil analysis, water analysis, tissue diagnostics, and identification of soil pathogens and pests. Based on the obtained results, our experts recommend both a step-by-step plan for application of fertilizers and measures to protect them. Our goal is to help Ukrainian agricultural workers make correct decisions rapidly. Our services are used by both large companies and clients of small farm enterprises. We are equally attentive to all our clients and look for an individualized approach to every one of them. We work for a result!

Collaboration proposal:

We offer consulting services to companies for agronomical support of agricultural projects. We offer an integral laboratory of agronomical studies as well as professional experts. Our company was established to help everyone who chose the grain grower's career. We will help you achieve high yields and protect your field against pests, diseases and other problems.

NDPI Vodoochysni Tekhnologii LLC

Business profile:

Research activities; manufacture and sale of chemical products, equipment and devices for industrial purposes.

Company's profile:

NDPI Vodoochysni Tekhnologii LLC was established in 1999. The institute features a comprehensive approach to addressing and achieving scientific and production objectives related to energy saving and ecology.

Пропозиція про співпрацю:

The institute offers domestic and foreign companies a complete package of services: inspection, engineering, start-up and adjustment, and scientific support of water treatment complexes, service maintenance for the customer, training of the customer's staff. Besides, it is one of Ukraine's largest manufacturers and suppliers of proprietary reagents for stabilizing and corrective treatment of grid water, boiler water and circulating water. In addition to reagents, the institute's pilot plant manufactures ion-exchange and clarification filters, unique drainage systems and dynamic filters for air and water decontamination, magnetic water grid sludge catchers, chemical dosing stations, and biochemical water deoxygenation units. The scientific research facilities created in the institute allow modeling real operation conditions of industrial enterprise circulation cycles, creating high thermal stresses to select the most efficient methods and technological solutions, and ensuring an optimal operation mode of process equipment. The institute's production facilities enables synthesis of various chemical products, manufacture of water treatment reagents, and produce standard and non-standard equipment for water treatment. By now, it has arranged serial production of water treatment devices for use in household conditions. An individual approach to every customer allows preparing the most effective proposals that enable achieving the highest possible economic outcome with minimal financial costs.

Starobilsk Dairy Plant PJSC

Business profile:

Milk processing, production of butter and cheese.

Company's profile:

One of constant advantages of our products is that they are made from "live" milk, without any conserving agents. Starobilsk Dairy Plant is a milk processing enterprise with a wide specialization: it manufactures wholemilk products, cheese spreads, butter, and casein. Dairy products made of cow milk contain all the elements necessary for your body – proteins, fats, carbohydrates, mineral salts, vitamins, ferments, microelements, especially calcium, and lactose that supports gut flora activity. Our products have natural flavour because we don't use any conserving agents in their manufacture, to preserve the natural strength and delicate flavour of natural milk and dairy products. Our milk is collected in vast and environmentally clean steppes of Starobilsk raion, in small farm enterprises. Clean air, lush grass and people's care make the consumption of Molochna Veselka TM products pleasant and useful.

Collaboration proposal:

We offer milk processing services, and production of all types of sourmilk products and casein.

Starobilsk Foodstuff Factory

Business profile:

Production of milling and grain industry's foodstuff.

Company's profile:

Under the VIRa trademark, Starobilsk Foodstuff Factory offers production of the milling and grain industry's foodstuff by manufacturer's prices, without intermediaries, for wholesale and retail trade. Affordable bakery products for every taste, the highest grade wheat flour, all kinds of pasta and cereals, vinegar, oil and other products of the highest quality. It tastes the same as in the childhood, since we produce it according to State Standards, without GMOs, flavour enhancers, artificial colouring agents and preservatives. We work on a closed cycle basis, and control all production stages until the food products get to our customers. Striving for the better future with VIRa! Besides, Starobilsk Foodstuff Factory offers carbonated and non-carbonated drinking water 'Starobila Sloboda' under VIRa trademark, drawn from the Starobilsk region's wells with crystal-clean water. Also, we produce drinks containing natural juices in a wide range, such as Duchess, Kvass, Orange, Apple, Strawberry, etc., for wholesale and retail trade. There is a flexible discount system.

Aidar Plus Fruit and Mineral Water Factory LLC

Business profile:

Production of bottled soft drinks, mineral and other waters.

Company's profile:

Aidar Plus Fruit and Mineral Water Factory LLC is a dynamically developing company with modern equipment, a quality control system and highly skilled specialists, which has become a leader in its segment and gained respect and confidence of customers. Our main goal is to meet the people's need for clean high-quality natural water to the greatest possible extent! The enterprise started its work in 1998. Its production facility is situated in Starobilsk city, in the east of Ukraine, where no industrial enterprise can be found, where there are no landfills or contaminated areas. The factory territory has an artesian well. Running through the deep-seated rock mass, water is naturally purified and enriched with minerals, acquiring its unique natural properties. Modern equipment and filtering system made by Ametek US firm allow preserving the water's useful properties and physical structure during water filling, carrying the natural water to our customers in its absolute purity and freshness. Quality of raw stuff, auxiliary materials and finished products is controlled by our production laboratory. All our products are certified, which is confirmed by certificates of conformity.

Collaboration proposal:

We offer a selection of Sribna Krynytsia clean, high-quality artesian water.

M-SPEKTR LLC

Business profile:

Manufacture of plastic containers.

Company's profile:

M-SPEKTR LLC, established in 2015, is a manufacturer of polymer food containers, compression fitting, and other polymer products. Using high quality polymers, colours and various components enables us to make European-level products at low Ukrainian prices, which meet demands of customers and at the same time complies with environmental, sanitary and other standards. Using our products, every customer protects his goods against counterfeiting to the highest possible extent. This is ensured both by modern individual design and by possible printing of logos on containers (by casting). Every year, the range of products manufactured by our company expands. Our products are well known in all regions of our country. Some container types are used by our partners to export their products to the former Soviet countries.

Collaboration proposal:

We offer our products to enterprises across the country engaged in manufacture of chemical products, building mixes, household chemical goods, and food products: polypropylene buckets with a security seal for packaging of foodstuffs (fish preserves, containers for mayonnaise, margarine, honey, salads, etc.); production of household containers, polythene collapsible tubes, cans for non-food products (paints, varnishes, glue, prime paints, etc.); compression fittings.
